

Installing Pep/8

The Pep/8 software is available at <http://code.google.com/p/pep8-1/downloads/list>.

On Windows XP:

1. Download the Pep813Win.zip file
2. Right click on the downloaded file, and select Extract All. This will create the folder Pep813Win, and inside this folder is Pep8.exe
3. Copy this file somewhere convenient – your desktop or computer science folder
4. Double-click on this file to start Pep/8

On Windows 7:

1. Download the Pep813Win.zip file; inside this folder is Pep8.exe
2. Copy this file to somewhere convenient – your desktop, or computer science folder
3. Double-click on this file to start Pep/8

On OS X:

1. Download the Pep813Mac.zip file
2. Double-click on the downloaded file to unarchive it. This should create the folder Pep813Mac.
3. Drag the Pep9.app file to somewhere convenient – your dock or desktop.
4. Click on that file to start Pep/8
